

WEEK ENDING.....23/09/2022.....

SUBJECT...MATHEMATICS

REFERENCE...SYLLABUS(CRDD.2007), MATHS FOR JHS

FORM.....BASIC 8.....WEEK.....2.....

| <u>DAY/DURATION</u> | <u>TOPIC/SUB-TOPIC/ASPECT</u> | <u>OBJECTIVES/R.P. K</u> | <u>TEACHER-LEARNER ACTIVITIES</u> | <u>T/L MATERIALS</u> | <u>CORE POINTS</u> | <u>EVALUATION AND REMARKS</u> |
|---|--|--|--|--|--|---|
| TUESDAY 20-09-2022 1:20PM – 2:40PM 80min | Topic; Ratio and Proportion Sub-Topic; Direct and Indirect Proportions | By the end of the lesson the Pupil will be able to; solve problems involving direct and indirect proportions RPK Pupils can explain the meaning of direct and indirect Proportion as they were taught ratio and Proportion in basic 6. | Introduction Pupils brainstorm to explain the meanings of direct and indirect Proportion. Activities 1. Guide pupils to solve problems involving direct proportion using unitary method. 2. Pupils in small groups to express two quantities as ratios and proportion using the ratio method Closure | Pictures, Chart, Scale, beam balance. | When two quantities X and Y are Directly Proportional to each other, we say “X is Directly Proportional to Y” or “Y is Directly Proportional to X”. When two quantities X and Y are Inversely Proportional to each other, we say that “X is Inversely Proportional to Y” or “Y is Inversely Proportional to X”  | Exercise; 1. Which of the following is in direct proportion? (a) One side of a cuboid and its volume. (b) Speed of a vehicle and the distance travelled in a fixed time interval. (c) Change in weight and height among individuals. |

Through questions and answers, conclude the lesson.

Direct & Indirect Proportion

$$A \propto B$$

Cost of 5 Books = ₹20

Cost of 8 Books = ?

$$A \propto 1/B$$

5 men does a piece of work in 10 days. In how many days 10 men will complete the same work?

06 Aptitude

1. Meenakshee cycles to her school at an average speed of 12 km/h and takes 20 minutes to reach her school. If she wants to reach her school in 12 minutes, her average speed should be (a) 20 3 km/h (b) 16 km/h (c) 20 km/h (d) 15 km/h 12.
2. 100 persons had food provision for 24 days. If 20 persons left the place, the provision will last for (a) 30 days (b) 96 5 days (c) 120 days (d) 40 days
3. If two quantities x and y vary directly with each other, then (a) x y remains constant. (b) x – y remains constant. (c) x + y remains constant. (d) x × y remains constant.
4. If two quantities p and q vary inversely with each other, then (a) p q remains constant. (b) p + q remains constant. (c) p × q remains constant. (d) p – q remains constant.
5. If the distance travelled by a rickshaw in one hour is 10 km, then the distance travelled by the same rickshaw with the

(d) Number of pipes to fill a tank and the time required to fill the same tank

2. A car covers a distance in 40 minutes with an average speed of 60 km per hour. The average speed to cover the same distance in 30 minutes is.....?

| | | | | | | |
|--|--|--|---|---|--|---|
| | | | | | <p>same speed in one minute is (a) 250 9 m (b) 500 9 m (c) 1000 m (d) 500 3 m</p> | |
| <p>THURSDAY</p> <p>22-09-2022</p> <p>8:05AM – 9:15AM 70min</p> | <p>Topic;</p> <p>Ratio and Proportion</p> <p>Sub-Topic; Sharing Quantities according to Proportions</p> | <p>Objective; By the end of the lesson the Pupil will be able to;</p> <p>share a quantity according to a given proportion</p> <p>RPK Pupils have been taught Ratio and Proportion in the previous class.</p> | <p>Introduction Review Pupils knowledge on the previous lesson.</p> <p>Activities</p> <ol style="list-style-type: none"> 1. Guide pupils to apply proportions in sharing quantities themselves. 2. Pupils practice solving questions on how to share quantities according to given proportions. <p>Closure Through questions and answers, conclude the lesson.</p> | <p>Pictures, Chart, Scale, beam balance.</p> | <p>Sharing quantities according to Proportions;</p> <p>Example; Ahmed and Ernest shared the profit gained from their business venture according to the proportion of the capital each contributed. If Ahmed contributed GH¢100 and Ernest contributed GH¢800 and Ernest's share of the profit was GH¢100, how much of the profit did Ahmed receive?</p> <div> <p>Sharing in a given ratio</p> <p>Ex 1: Share 50 sweets between Paul and Jim in the ratio 3 : 7</p> <p>$50 \div 10 = 5$</p> </div> | <p>Exercise;</p> <ol style="list-style-type: none"> 1. Yesterday, I put 10 gallons of gas in my car and I paid \$30. A couple hours after, I went back to the gas station with my dad's car and after filling up the tank, I paid \$18. How many gallons of gas did I put in my dad's car?" |

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | | | | <p>2. If every gallon of gas costs \$2 and I have \$30 in my wallet, I'll be able to put 15 gallons in the tank and if I wanted to put in 20 gallons, I'd have to pay \$40"</p> <p>REMARKS.</p> |
